

Appln No. 10/659,023
Amdt. Dated May 11, 2006
Response to Office Action of March 8, 2006

2

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A handheld mobile communications device that comprises
a support structure;
an antenna mounted on the support structure for transmitting and receiving radio
signals;
a print media feed apparatus configured to receive separate sheets of print media and
to pass the separate sheets past a printhead;
radio signal processing circuitry positioned on the support structure to process the radio
signals; and
a speaker and microphone arrangement positioned on the support structure and
operatively connected to the radio signal processing circuitry, wherein
a the printhead is positioned on the support structure to carry out a printing operation
on at least one sheet of print media; and
printing processing circuitry is positioned on the support structure to control operation
of the printhead.
2. (Original) A communications device as claimed in claim 1, in which the radio
signal processing circuitry and the printing processing circuitry are configured so that the
printing processing circuitry and the radio signal processing circuitry can function
simultaneously.
3. (Original) A communications device as claimed in claim 2, in which the radio
signal processing circuitry and the printing processing circuitry are in the form of at least one
application specific integrated circuit.
4. (Original) A communications device as claimed in claim 1, in which the radio
signal processing circuitry is that of a mobile telephone.
5. (Original) A communications device as claimed in claim 1, in which the
printhead is a pagewidth printhead.
6. (Original) A communications device as claimed in claim 5, which includes an
ink distribution unit that is arranged on the printhead to supply ink to the printhead.
7. (Original) A communications device as claimed in claim 1, which includes a
print media feed mechanism for feeding print media relative to the printhead so that the
printing operation can be carried out on the print media.
